

High Country Tek, Inc.

Product Branding and Private Labeling

Electronic Control Solutions for the Global Fluid Power Industry

What we offer:

- Products from the industries foremost independent U.S. based controller manufacturer
- Analog, Digital and Programmable controller ranges are all available with these branding options
- Product labels, custom part numbers, editable literature and branded Graphical User Interfaces are all offered
- Technical guidance and support as required to ensure smooth integration into your company
- Access as required to test and certification data for onward support of your customer base
- All mention or reference to HCT is removed from the products and software as part of this process.

Market Advantages & Benefits:

- Proven technology, ready for user applications with minimal investment for R&D, field trials or development costs
- Immediate access to evolving markets as they emerge without lead time
- PC Graphical User Interfaces (GUI) written and ready for easy user application
- Reliable products that compliment , advance or 'Gap-Fill' existing ranges in your portfolio
- Revenue growth in market arenas previously not available to you because of cost to market or limited resources
- Opportunity to offer your customers a high quality, reliable controller with your own company identity

Product Types Available:

Three main product types are offered to suit your need:-

1. **Analog - Potentiometer adjustments**
2. **Digital - Set-up through pre-written PC GUI**
3. **Programmable - Fully user definable parameters**

HCT has products that can be used with virtually all OEM equipment and in virtually any circumstance.

Analog controllers are offered for situations where PC's or complicated test equipment may be less available with only a potentiometer adjustment tool being needed to get up and running.

The digital modules offered can be either universal valve / pump drivers or designed to control a specific applications such as hydraulic fan or generator systems. All come with a pre-written PC GUI that allows all the relevant settings to be programmed quickly and easily.

The programmable units are from the industry established DVC family with multiple options for expansion and accessories that allow a complete solution to be assembled and programmed to exactly suit the need.

Branding & Private Label options:
